## Mark Scheme (Results)

Summer 2022

Pearson Edexcel International Advanced Level In Accounting (WAC11) Paper 01 The Accounting System and Costing

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

1(a) AO1 (4)

## A01: Four marks for explaining the difference

| Revenue Expenditure | Capital expenditure |
| :--- | :--- |
| Day to day running expenses | Purchasing non-current assets |
| Costs appear in the income statement | Cost appears in the financial position <br> statement |
| Cost charged against income for one <br> year | Cost spread over several years by charging <br> depreciation |

Note: do not accept examples only.
$2 \times 2 \times(1) A O 1$

| TOTAL CAPITAL AND LIABILITIES |  |  | $\underline{\underline{126150}}$ |

## (f) AO1 (1) AO2 (1) AO3 (5) AO4 (5)

## Positive points in favour of selling cash only

Improves the cash flow of Linda and Rishi as cash is received immediately.
Eliminates irrecoverable debts as customers are not receiving credit.
Less book-keeping for Linda and Rishi with no trade receivables ledger to prepare.
Less demand for book-keeping services.
No cash discounts to pay improved profit
No credit control, telephone calls and letters

## Negative points against selling cash only

Not everybody has cash to purchase with, therefore, sales will be lost. Many customers will need to sell the goods before making their payment.

Some customers will go to rival sellers rather than purchase from Linda and Rishi. Smaller market share.

Competitors will be able to grow their businesses and provide greater competition to Linda and Rishi.

Security issues with a large amount of cash on hand will make Linda and Rishi a target for thieves.

Possibility of fraud as cash is being paid into the business. The temptation for fraud will be higher.

Decision
Candidates may conclude that it is/or is not better to trade on a cash only basis. Candidates should support that decision with an appropriate rationale.

| Level | Mark | Descriptor |
| :--- | :--- | :--- |
|  | 0 | A completely incorrect response. |
| Level 1 | $1-3$ | Isolated elements of knowledge and understanding recall based. <br> Weak or no relevant application to the scenario set. <br> Generic assertions may be present. |
| Level 2 | $4-6$ | Elements of knowledge and understanding, which are applied to <br> the scenario. <br> Chains of reasoning are present, but may be incomplete or invalid. <br> A generic or superficial assessment is present. |
| Level 3 | $7-9$ | Accurate and thorough understanding, supported throughout by <br> relevant application to the scenario. <br> Some analytical perspectives are present, with developed chains <br> of reasoning, showing causes and/or effects. <br> An attempt at an assessment is presented, using financial and <br> non-financial information, in an appropriate format and <br> communicates reasoned explanations |
| Level 4 | $10-12$ | Accurate and thorough knowledge and understanding, supported <br> throughout by relevant and effective application to the scenario. <br> A coherent and logical chain of reasoning, showing causes and <br> effects. <br> Assessment is balanced, wide ranging and well contextualised <br> using financial and non-financial information and makes informed <br> recommendations and decisions. |

(12)

| Q1 | Total marks | 55 |
| :--- | :--- | :--- |

2 (a)
AO2 (12)
AO2: Twelve marks for calculating and inserting correct entries

| Ratio | Calculation | Answer |
| :---: | :---: | :---: |
| (i) Inventory turnover (in times per year) | $\frac{90000}{(12000+18000) / 2(1) \mathrm{AO} 2}$ | 6 times (1) AO2 |
| (ii) Gross profit as a percentage of revenue | $\frac{150000 \times 100(1) \mathrm{AO} 2}{240000}$ | 62.50\% (1) AO2 |
| (iii) Profit for the year as a percentage of revenue | $\frac{40000 \times 100(1) \mathrm{AO} 2}{240000}$ | 16.67\% (1) AO2 |
| (iv) Percentage return on capital employed | $\frac{40000+4000 \times 100(1) \mathrm{AO} 2}{120000+50000}$ | 25.88\% (1) AO2 |
| (v) Trade payables collection period (in days) | $\frac{15000 \times 365(1) \mathrm{AO} 2}{96000}$ | 57.03 days (1) AO2 |
| (vi) Trade receivables collection period (in days) | $\frac{18000 \times 365}{216000(1)} \mathrm{AO} 2$ | 30.42 days (1) AO2 |

Accept reasonable rounding
(b)(i) AO2 (2) AO3 (2)

AO2: Two marks for a qualitative comment about the movement of the ratio.
AO3: Two marks for development of a possible reason for the movement.

## OWN FIGURE RULE APPLIES

Gross profit as a percentage of revenue has improved (1) AO2 this may be due to reducing costs of purchasing or increasing selling prices. (1) AO3

Profit as a percentage of revenue has improved (1) AO2 although expenses appeared to have increased in the year they have been controlled. (1) AO3

The return on capital employed has deteriorated, (1) AO2 this is probably due to the increased capital employed through the bank loan. (1) AO3

The return on capital employed is still at a high level of 25.9\%, (1) AO2 well above an acceptable return level of 10-15\%. (1) AO3

MAX 2 points $\times$ (1) AO2 plus $2 \times(1)$ AO3 for development.
(ii) AO2 (2) AO3 (2)

AO2: Two marks for a qualitative comment about the movement of the ratio.
AO3: Two marks for development of a possible reason for the movement.

## OWN FIGURE RULE APPLIES

The current ratio has improved (1) AO2 this is probably due to increasing the level of inventory over the period. (1) AO3

The current ratio improvement above the accepted level of 1.4-2:1(1) AO2 has led to idle funds in the current assets. (1) AO3

The rate of inventory turnover has deteriorated (1) AO2 this may be due to increasing the level of inventory by the end of the period. (1) AO3

The liquid ratio is fairly constant over the period (1) AO 2 and within the accepted levels of 0.71:1. (1) AO3

Trade payables payment period has deteriorated substantially. (1) AO2 Possibly may cause problems with future credit purchases. (1) AO3

Trade receivables collection period has improved marginally (1) AO2 and is around the accepted 30 days /showing good credit control procedures. (1) AO3

MAX 2 points $\times$ (1) AO2 plus $2 \times(1) \mathrm{AO} 3$ for development.
(c)(i) $\mathbf{A O 1}$ (4)

A01: Four marks for explaining the difference.
Fixed costs do not change (1) AO1 with the level of activity. (1) AO1
Variable costs change in direct proportion (1) AO1 to the level of activity. (1) AO1
(ii) AO1 (4)

A01: Four marks for explaining the difference.
Semi-fixed costs are constant over a range of activity (1) AO1 The cost will then increase and then remain constant over the next range of activity. (1) AO1

Semi-variable costs include an element of fixed cost regardless of the level of activity. (1) AO1 As activity increases the variable element will increase in proportion to the increase in activity. (1) AO1
(d) AO2 (4)

## AO2: Four marks for interpreting behaviour of costs.

| Fixed cost | Rent (1) AO2 |
| :--- | :--- | ---: |
| Variable cost | Purchases or Cost of sales (1) AO2 |
| Semi-fixed cost | Depreciation (1) AO2 |
| Semi-variable cost | General expenses |

(e) AO2 (3) AO3 (2)

AO2: Three marks for calculating and inserting entries.
A03: Two marks for two stage calculations and inserting entries.

(f) AO1 (3) AO2 (3)

A01: Three marks for identifying social accounting issues.
AO2: Three marks for developing the issues.

| Social accounting | Development |
| :--- | :--- |
| Local community | Support the local community with an appropriate level of <br> paid employment. |
| Environment | Non-polluting process/transport which limits emissions to <br> stay within legal limits. |
| Workforce | Ensure that workforce is appropriately trained and is <br> developed to better meet objectives. |
| Health and safety | Ensure that the process and practices do not injure or <br> adversely affect the health of employees. |
| Use of natural <br> resources | Use sustainable materials ensuing the future supply of <br> materials. |

$3 \times(1)$ AO1 for identification PLUS $3 \times(1)$ AO2 for development.
(g) AO1 (1) AO2 (1) AO3 (5) AO4 (5)

## Positive points in favour of judging a business solely on profitability ratios

Ratios enable comparison to be made between Syed's business and other similar businesses.
There are 'yardsticks' that can be used to assess progress of the business, most commonly the businesses comparison with its previous year's results.

Return on capital employed percentage is directly comparable across all businesses and can be comparable with alternative investments.

Profit is the main driver for the businessman

## Negative points against judging a business solely on profitability ratios

Non-financial factors are ignored but these are critical for future prospects of Syed's business. Factors such as the innovation of the management, skill of the workforce, product development are critical but ignored if only financial considerations are considered.

Social factors are ignored, such as the businesses impact on the workforce, the environment, the community, this will have a detrimental effect on the image of Syed's business.

Liquidity and use of assets also needs to be considered.
Ethical factors needs to be considered.

## Decision

Candidates may conclude that the use of profitability ratios as the way of judging the success of a business is or is not appropriate. Candidates should support that decision with an appropriate rationale.

| Level | Mark | Descriptor |
| :--- | :--- | :--- |
|  | 0 | A completely incorrect response. |
| Level 1 | $1-3$ | Isolated elements of knowledge and understanding recall based. <br> Weak or no relevant application to the scenario set. <br> Generic assertions may be present. |
| Level 2 | $4-6$ | Elements of knowledge and understanding, which are applied to <br> the scenario. <br> Chains of reasoning are present, but may be incomplete or invalid. <br> A generic or superficial assessment is present. |
| Level 3 | $7-9$ | Accurate and thorough understanding, supported throughout by <br> relevant application to the scenario. <br> Some analytical perspectives are present, with developed chains <br> of reasoning, showing causes and/or effects. <br> An attempt at an assessment is presented, using financial and <br> non-financial information, in an appropriate format and <br> communicates reasoned explanations |

Deficit

## (d) AO1 (1) AO2 (1) AO3 (5) AO4 (5)

## OWN FIGURE RULE APPLIES

## Positive points for the club

The Hillside Club made a profit on the dance.
The Hillside Club was close to breaking-even on its activities with only a small deficit.

## Negative points against the club

The Hillside Club made a small deficit which will need addressing over time to retain the funds to maintain the activities and club growth.
There are still $£ 860$ of subscriptions due for the last year which could result in some irrecoverable debts.
The Hillside Club should assess whether these are likely to be paid and should improve its subscription collection process.
The Hillside Club has not allowed for any possible irrecoverable debts.
The Hillside Club has an overdraft and a shortage of cash.
Decision
Candidates may conclude that the club is favourably or unfavourably placed. Candidates should support that decision with an appropriate rationale.

| Level | Mark | Descriptor |

## Points for being able to avoid irrecoverable debts

Marvin could only make cash sales. However, a proportion will need to be made on credit or sales will decline substantially. The proportion on credit runs the risk of irrecoverable debts.

Marvin should ensure the careful financial vetting of customers to whom he intend to sell goods on credit this should reduce irrecoverable debts.

Speedy invoicing and credit control will pressure debtors to pay regularly.

## Points for not being able to avoidable irrecoverable debts

Marvin will have to sell some goods on credit running the risk of debts being irrecoverable.

Marvin should ensure that sufficient resource are applied to the collection of debts through credit control procedures.

Regular customers circumstances may change making it more likely that they could become bankrupt and their debt will be irrecoverable.

Decision
Candidates may conclude that all recoverable debts can be avoided or not avoided. Candidates should support that decision with an appropriate rationale.

115
(c)AO2 (1) AO3 (2) AO4 (3)

Positive points for day work/ negative points for group bonus scheme
Day work is a lot simpler to operate for Harptree Manufacturing. No standard times to complete goods required as would be the case with a bonus scheme.

Quality can be more accurately controlled by Harptree Manufacturing with day work as production workers have no incentive to 'cut corners' when producing work.

Slower workers will not feel that they are unable to keep up with the pace of other workers.

Negative points for day work/ positive points for group bonus scheme.
Day work does not motivate the production staff of Harptree Manufacturing to be efficient with their time, but group bonus scheme will. This will increase cost per unit.

Group bonus scheme should result in production workers working faster and as a team, but this may result in a higher accident rate.

Group bonus scheme will reduce cost per unit of goods produced by Harptree Manufacturing.

## Decision

Candidates may conclude that the proposed change is/is not beneficial. Candidates should support that decision with an appropriate rationale.

| Level | Mark | Descriptor |
| :--- | :--- | :--- |
|  | 0 | A completely incorrect response. |

6(a) AO1(3) AO2(3)

## A01: Three marks for stating the basic concept

A02: Three marks for explaining concepts application
(i) All non-current assets must be recorded at their cost price (1) AO1 although the replacement/ market value may have increased or decreased. (1) AO2
(ii) Once a depreciation method has been chosen it should be used consistently over the life of the asset. (1) AO1 This will ensure that profits are not distorted over the years. (1) AO2
(iii) It is assumed that the business will continue with perpetual/indefinite life. (1) AO1 The non-current asset should therefore be depreciated over its full economic life. (1) AO 2
(6)
(b) AO2 (1) AO3 (3)

AO2: One mark for calculating depreciation owned for a full year A03: Three marks for multiple stage calculation of depreciation.

## £

Asset sold on 1 Aug $24000 \times 15 \%=3600$ multiplied by $3 / 12=900(1) \mathrm{AO} 3$
Assets purchased on 1 November $32000 \times 15 \%=4800$ multipliedby 6/12 = 2400 (1) AO3
Asset purchased on 1 January $16000 \times 15 \% \times 4 / 12$
All other assets $216000 \times 15 \%$
$=32400$ (1) AO3
Total depreciation charge

(4)
(d) AO1 (3)

A01: Three marks for stating disadvantages.

- Valuation is just a judgement and difficult to get accurate.
- Considerable work in revaluing non-current assets every year.
- Requires input from specialist valuers.
- Can distort profits as valuations fluctuate.
- Brings the use of the historic cost concept into question.
- Does not comply with equal use same depreciation
- Revaluation usually used on small items only.
$3 \times(1)$ AO1
(e) AO2 (1) AO3 (2) AO4 (3)

Positive points for straight line method/ negative points for an alternative method Charges the same depreciation to Highgate Construction income statement each year representing even usage over the years.

Does not distort the profits of Highgate Construction by depreciation charges being high in the early years and lower in the later years.

The use of a revaluation method would require annual input from a professional valuer to assess current values. Straight line does not require that input or incur that cost.

Straight line is based on historic cost concept, re-valuation is subjective and may go against that concept.

Negative points for straight line method/positive points for alternative method Many non-current assets lose a high proportion of their value in the early years. This is particularly common with equipment such as that are owned by Highgate Construction as evidenced by the market value of the digger.

Non-current assets such as equipment will be over-valued in the books of Highgate Construction in the early years using straight line method.

As the years progress the straight-line method will increase the costs of Highgate Construction when depreciation and maintenance are considered.

## Decision

Candidates may conclude that the straight-line method is appropriate/is not appropriate. Candidates should support that decision with an appropriate rationale.

| Level | Mark | Descriptor |
