

## CAMBRIDGE INTERNATIONAL EXAMINATIONS Cambridge International Advanced Subsidiary and Advanced Level

## MARK SCHEME for the May/June 2015 series

### 9706 ACCOUNTING

**9706/23** Paper 2 (Structured Questions – Core),

maximum raw mark 90

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2015 series for most Cambridge IGCSE<sup>®</sup>, Cambridge International A and AS Level components and some Cambridge O Level components.

### 1 (a)

# Vikran Manufacturing account for the year ended 30 June 2014

	\$		\$
Raw materials			
Inventory at 1 July 2013	39 000	)*	
Purchases	162000		
Purchase returns	(1200)		
Carriage inwards	4 2 0 0		
	204 000		
Inventory at 30 June 2014	<u>(46 000)</u>	)*(1) both	158 000 <b>(1) CF</b>
Manufacturing wages			<u>259 100</u> <b>(1)</b>
Prime cost (must be labelled)			417 100 <b>(1) OF</b>
Overheads			
Factory supervision salaries	12400	)	
General factory expenses	8 100	) (1)	
Indirect factory wages	36 800	)	
Heat and light (\$5400 + \$600 <b>(1)</b> ) × 85%	5 100	(1) OF	
Insurance $($12000 - $4000 (1)) \times 80\%$	6400	(1) OF	
Rent and rates \$42 000 × 85%	35700	(1) CF	
Depreciation plant and machinery			
$(\$270000 - \$90000) \times 15\%$	<u>27 000</u>	(1) CF	<u>131 500</u>
			548 600
Work in progress at 1 July 2013	48 000	(1)	
Work in progress at 30 June 2014	<u>54 000</u>	(1)	(6000)
Production cost of finished goods			<u>542600</u> <b>(1) OF</b>
(must be labelled)			

(b)

## Vikran Income statement for the year ended 30 June 2014

	\$		\$	
Sales revenue			768 500	
Returns inwards			<u>(1800)</u>	
			766 700	(1) CF
Cost of sales				
Opening inventory finished goods	57 000	(1)		
Cost of production	542600	(1) OF		
Purchase finished goods	2100	(1)		
	601700			
Closing inventory finished goods	<u>(52 000)</u>	(1)	<u>549700</u>	
Gross profit (must be labelled)			217000	(1) OF
Provision for doubtful debts			610	(1)
			217610	
Deduct: expenses				
Office salaries	37 300	(1)		
Heat and light	900	)		
Rent and rates	6 300	)(1)		
Insurance	1600	)		
Depreciation office equipment W1	7800	(1)		
Bad debt written off	1800	(1)	55700	
Profit for the year (must be labelled)		-	<u>161910</u>	(1) OF

#### **Workings**

W1 Depreciation  $($90\ 000 - $38\ 000) \times 15\% = $7800$  [12]

(c) Depreciation represents that part of the cost of an asset that is consumed during the accounting period (1). This follows the matching (accruals) concept (1). The value of an asset decreases over time due to, for example, wear and tear, obsolescence (max 1 mark for examples). Depreciating the value of a non-current asset avoids overstating the net assets of the business (1) and ensures that the statement of financial position shows a true and fair view (1).

[Total: 30]

Page 4	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – May/June 2015	9706	23

2 (a)

Ratio	Formula	Calculation
Inventory turnover	(Average inventory/cost of sales) × 365 (1)	$\frac{(50000+65000)/2}{50000+280000-65000}  \frac{\text{(1)}}{\text{(1)}}$ $\times 365 = 79.2 \text{ days (1 OF)}$
Trade receivables turnover	Trade receivables/credit revenue × 365 (1)	$\frac{45000}{425000}$ $\times 365 = 38.6 \text{ days (1)}$
Trade payables turnover	Trade payables/credit purchases × 365 (1)	$\frac{22000}{280000}$ × 365 = 28.7 days (1)
Non-current asset turnover	Revenue/Non-current assets at NBV (1)	$\frac{425000}{350000}$ ) 1 OF = 1.21 times (1)
Current ratio	Current assets/current liabilities (1)	$\frac{110000}{40000} = 2.75:1  \textbf{(1)}$

[13]

- (b) (i) Inventory turnover is slow. This suggests low sales which impacts on profit and cash flow. There will be higher holding costs including the risk of obsolescence. [3]
  - (ii) Customers are paying after the credit terms.This suggests poor credit control procedures.Cash flow will be slower and there will be a higher risk of bad debts.[3]
  - (iii) Suppliers are being paid early. This adversely affects cash flow especially as suppliers are being paid before customers pay. It is likely however that prompt payment cash settlement discounts will be available.

    [1 mark for valid point to max 3 in each case]

    [3]

	Cambridge International AS/A Level – May/June 2015	9706	23

#### (c) Partnership:

Advantages:

Possibly more capital Shared risk and workload

Disadvantages:

**Unlimited liability** 

Need to earn more profit than a sole trader to support partner.

Possible disputes between partners.

#### [1 mark per valid point to max of 4]

Private limited company:

Advantages:

Limited liability Shared workload

Disadvantages:

Possible disputes between shareholders

Not all shareholders may take part in running the business

[1 mark per valid point to max of 4]

[8]

[Total: 30]

3 (a) 
$$$14.00 - (3.20 + 2.40)$$
 (1) =  $$8.40$  (1) OF

[2]

#### (b) Marginal cost

	February	N	//arch	
	\$	\$	\$	\$
Sales		182000 <b>)</b>		238 000 <b>(1) both</b>
Opening inventory	-		11200	
Production cost	84 000		84 000	(1)
Closing inventory	<u>(11 200)</u> <b>(1)</b>	<u>72800</u> (1) <b>OF</b>		<u>95 200</u> (1) <b>OF</b>
Contribution		109 200 <b>(1) OF</b>		142 800 <b>(1) OF</b>
Fixed costs		88 000		88 000
Profit		21 200 (1) <b>OF</b>		<u>54800</u> (1) <b>OF</b>

[9]

#### (c) Absorption cost

Overhead absorption rate = \$88 000 / 16 000 = \$5.50 per unit (1)

[1]

Page 6	Mark Scheme	Syllabus	Paper
	Cambridge International AS/A Level – May/June 2015	9706	23

#### (d) Absorption cost

	F	ebruary	ry March					
		\$		\$		\$	\$	
	Sales			182000			238 000	
	Opening inventory	_				22200		
	Production cost	166 500				166 500		(3)
	Closing inventory	(22 200)	(2)	<u>144 300</u>	(1) OF		<u>188 700</u>	(1) OF
				37700			49300	
	Under absorption			<u>5500</u>	(1) OF		<u>5500</u>	(1) OF
	Profit			<u>32 200</u>	(1) OF		<u>43800</u>	(1) OF
	3 marks split 22 200 <b>(1)</b> of, 16 Closing inventory 2000 <b>(1)</b> ×	. ,			(1) OF.			[11]
(e)	Profit per marginal costing Closing inventory 2000 × \$5. Profit per absorption costing	50 <u>\$1</u>	<u>1 000</u>	(1) OF (1) (1) OF				[3]

(f) Using marginal costing fixed costs are written off in the month they are incurred (1) Using absorption costing they are treated as part-off the cost of inventory and carried forward (1) to the next month. (1) Therefore closing inventory using absorption costing will be valued (1) at a higher figure (1) which will increase the profit for the month.
