MARK SCHEME for the May/June 2015 series

9706 ACCOUNTING

9706/42

Paper 4 (Problem Solving – Supplement),
maximum raw mark 120

This mark scheme is published as an aid to teachers and candidates, to indicate the requirements of the examination. It shows the basis on which Examiners were instructed to award marks. It does not indicate the details of the discussions that took place at an Examiners' meeting before marking began, which would have considered the acceptability of alternative answers.

Mark schemes should be read in conjunction with the question paper and the Principal Examiner Report for Teachers.

Cambridge will not enter into discussions about these mark schemes.

Cambridge is publishing the mark schemes for the May/June 2015 series for most Cambridge IGCSE[®], Cambridge International A and AS Level components and some Cambridge O Level components.

- (e)
- A's drawings are very steady at \$500 a month **(1)**
 - A's drawings are lower than his profit from the partnership **(1)**, in 2014 \$16 060 lower **(1)OF**
 - A appears to wish to retain profit in the partnership for the growth of the business **(1)**
 - N's drawings appear to have a rising trend **(1)**
 - N's relatively small balance on her current account at the start of the year indicates a history of taking almost all her profits as drawings **(1)**
 - In the first half of 2014 N took almost all her profits as drawings **(1)**
 - In the second half of 2014 N was overdrawing **(1)**
 - N appears to consider maximising short-term drawings more important rather than leaving cash in the partnership for growth. [max 6]

 = $\$3 328 (1)OF$

Average investment = $\$10 000 (1)$

Accounting rate of return = $33.28\% (1)OF$ [6]

(d) The NPV is higher for the London taxi (1). The IRR is lower for the London taxi (1). The ARR is higher for the London taxi (1). However, NPV is a better measure (1) as it takes into account time value of money (1). Therefore Abdul should buy the London taxi (1). [Max 4] [4]

(e) (i) Advantage – dividends need not be paid if profits are insufficient (1)
 Disadvantage – ordinary shareholders control the company as they have the vote (1) [2]

(ii) Advantage – entitled to vote at the AGM/may earn a higher dividend as profits increase (1)
 Disadvantage – Ordinary shareholders must stand any losses on a winding-up/may not receive any dividend at all if profits insufficient. The dividend is variable and based on profits (1) [2]

(f) (i) Advantage – fixed dividend assists cash flow management (1)
 Disadvantage – may be treated as financing costs if shares are redeemable/rate of interest on overdraft/capital may be lower than rate of dividend payable on shares. No control over the amount of dividend as it is fixed. (1) [2]
