General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

| Level | Mark | Descriptor |
|----------|------|---|
| | 0 | No rewardable material. |
| 1 | 1-2 | Isolated elements of knowledge and understanding – recall based. Weak or no relevant application to business examples. Generic assertions may be presented. |
| 2 | 3-5 | Accurate knowledge and understanding. Applied accurately to the business and its context. Chains of reasoning are presented, showing cause(s) and/or effect(s) but may be assertions or incomplete. An attempt at an assessment is presented that is unbalanced and unlikely to show the significance of competing arguments. |
| 3 | 6-8 | Accurate and thorough knowledge and understanding, supported throughout by relevant and effective use of the business behaviour/context. Logical chains of reasoning, showing cause(s) and/or effect(s). Assessment is balanced, well contextualised, using quantitative and/or qualitative information, and shows an awareness of competing arguments/factors. |

| 1 | 1-2 | Isolated elements of knowledge and understanding – recall based. Weak or no relevant application to business examples. Generic assertions may be presented. |
| 2 | 3-4 | Elements of knowledge and understanding, which are applied to the business example. Chains of reasoning are presented, but may be assertions or incomplete. A generic or superficial assessment is presented. |
| 3 | 5-7 | Accurate and thorough knowledge and understanding, supported throughout by relevant and effective use of the business behaviour/context. Analytical perspectives are presented, with developed chains of reasoning, showing cause(s) and/or effect(s). An attempt at an assessment is presented, using quantitative and/or qualitative information, though unlikely to show the significance of competing arguments. |
| 4 | 8-10 | Accurate and thorough knowledge and understanding, supported throughout by relevant and effective use of the business behaviour/context. A coherent and logical chain of reasoning, showing cause(s) and/or effect(s). Assessment is balanced, wide ranging and well contextualised, using quantitative and/or qualitative information and shows an awareness of competing arguments/factors, leading to a supported judgement. |

Other relevant points must also be credited.</p> <p>Knowledge, Application, Analysis, Evaluation – indicative content</p> <ul style="list-style-type: none">• The exchange rate is the price of one currency in terms of another• Depreciation of the pound sterling (£) means it can buy less of another currency than previously; it has gone down in value• The pound sterling (£) depreciated to €1.19 and then €1.14 following the EU referendum in 2016 (from €1.40)• This meant that overseas customers could buy more pounds (£) with their own currencies, therefore making British goods cheaper to overseas buyers• When the currency is weaker, it can be easier to offer competitive prices to overseas customers who might not be able to buy the same goods or services, produced domestically, any cheaper• A survey has shown demand for British products increased for many small to medium-sized businesses between 2016 and 2017. This coincides with the timing of the EU referendum and subsequent depreciation of the pound (£)• If British products are cheaper to overseas buyers, they are likely to increase demand for them, thus potentially being the reason for the increase between 2016 and 2017• However the nature of the specific product on offer is also a factor. A product or service not commonly found in the target country's market, a unique or high quality product is more likely to attract custom regardless of price• Positive perceptions of the quality of British products, a reputation for good customer service, and the familiarity of many British 'brands' such as the BBC, music artists and the Royal Family were all quoted as reasons British exports sell, to give examples of the above• We do not know if the British firms kept the prices constant following the depreciation of the pound (£). If they imported raw materials they may have increased prices to cover higher costs.• The survey was only conducted on small to medium-sized businesses and does not take into account of large businesses. This possibly means there has not been an increase overall in demand for British products during the period• Other factors such as high inflation in the target country or rising costs of production could have contributed to overseas customers increasing demand for British products• Overall it is likely a combination of the pound (£) depreciating and factors such as improved quality and the reputation of British brands led to the increase in demand for the British products shown |
