International Advanced Subsidiary Unit 2: Macroeconomic Performance and Policy

Monday 16 October 2017 – Afternoon

Time: 1 hour 30 minutes

Paper Reference

WEC02/01**You do not need any other materials.**

Total Marks

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** the questions in Section A and **one** question from Section B.
- Answer the questions in the spaces provided
– there may be more space than you need.

Information

- The total mark for this paper is 80.
- The marks for **each** question are shown in brackets
– use this as a guide as to how much time to spend on each question.
- You should take care in your responses with your spelling, punctuation and grammar, as well as the clarity of expression.
- Calculators may be used.

Advice

- Read each question carefully before you start to answer it.
- Check your answers if you have time at the end.

SECTION A

Answer ALL questions in this section.

You should spend 35 minutes on this section. Use the data to support your answers where relevant. You may annotate and include diagrams in your answers.

- 1 The Kazakhstan Central Bank decreased the base interest rate from 15% to 13% in July 2016.

(a) Ceteris paribus, this is likely to lead to a decrease in

(1)

- A economic growth
- B investment
- C unemployment
- D aggregate supply

Answer

(b) Explanation

(3)

(Total for Question 1 = 4 marks)

SECTION B

Answer EITHER Question 9 OR Question 10.

You should spend 55 minutes on this section.

If you answer Question 9 put a cross in the box .

Question 10 starts on page 26.

9 The economy of Poland

Figure 1 Annual percentage change in real GDP and rate of inflation, 2008–2015

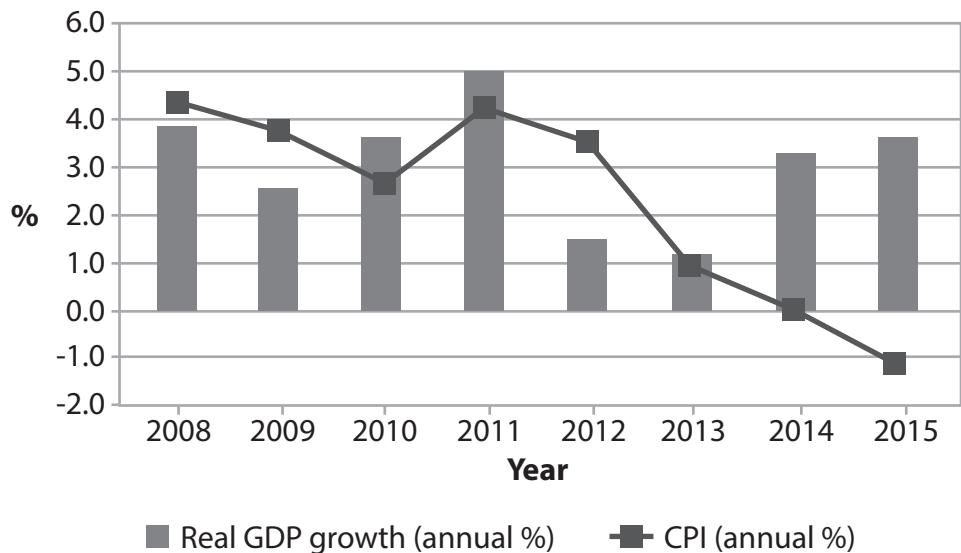

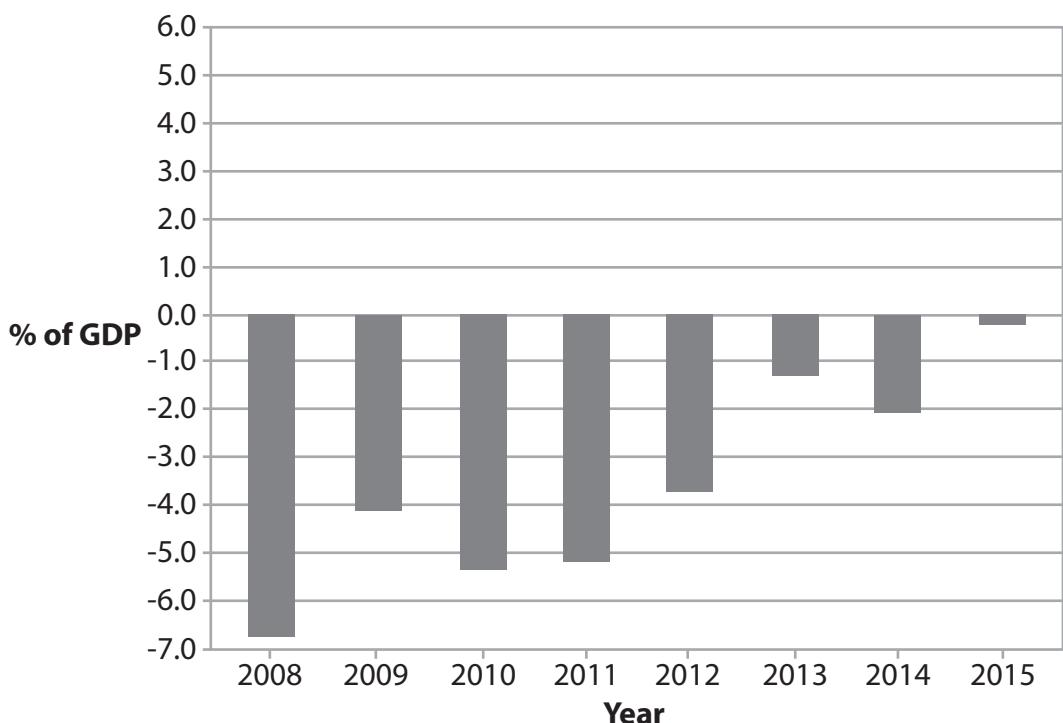

Figure 2 Current account of the balance of payments as a percentage of GDP, 2008–2015

(Source: <http://data.worldbank.org/country/poland>)

Extract 1 Government proposals to encourage investment and innovation

The Polish Government is proposing a package of measures, including tax breaks for investment, to encourage innovation and promote economic growth. The proposals would also remove the current five-year time limit on how long inventors can claim a share of commercial revenue from their inventions.

5

In 2017, the tax on revenue from intellectual and industrial property will be reduced. There will also be additional financial incentives for investment in research and development. One of the stated aims of the proposals is to create a "knowledge economy" in Poland and therefore help the country to become a high income economy.

10

(Source: adapted from <http://www.thenews.pl/1/12/Artykul/266913, Government-proposals-to-encourage-innovation>)

Extract 2 Inflationary pressures

After an extended period of falling consumer prices, inflationary pressures are expected to remain low until 2017. Since 2012, the annual rate of consumer price inflation has remained well below Poland's Central Bank target of 2.5%.

In mid-2014, there was deflation, mainly driven by falling energy and food prices. In 2016 and 2017, consumer prices are expected to rise slightly as a result of strong domestic demand and higher energy and food prices. Prices are also expected to increase due to the new tax on financial sector assets and the planned tax on the retail sector.

5

10 The economy of Turkey

Figure 1 Annual percentage change in real GDP and the current account of the balance of payments as a percentage of GDP, 2008–2015

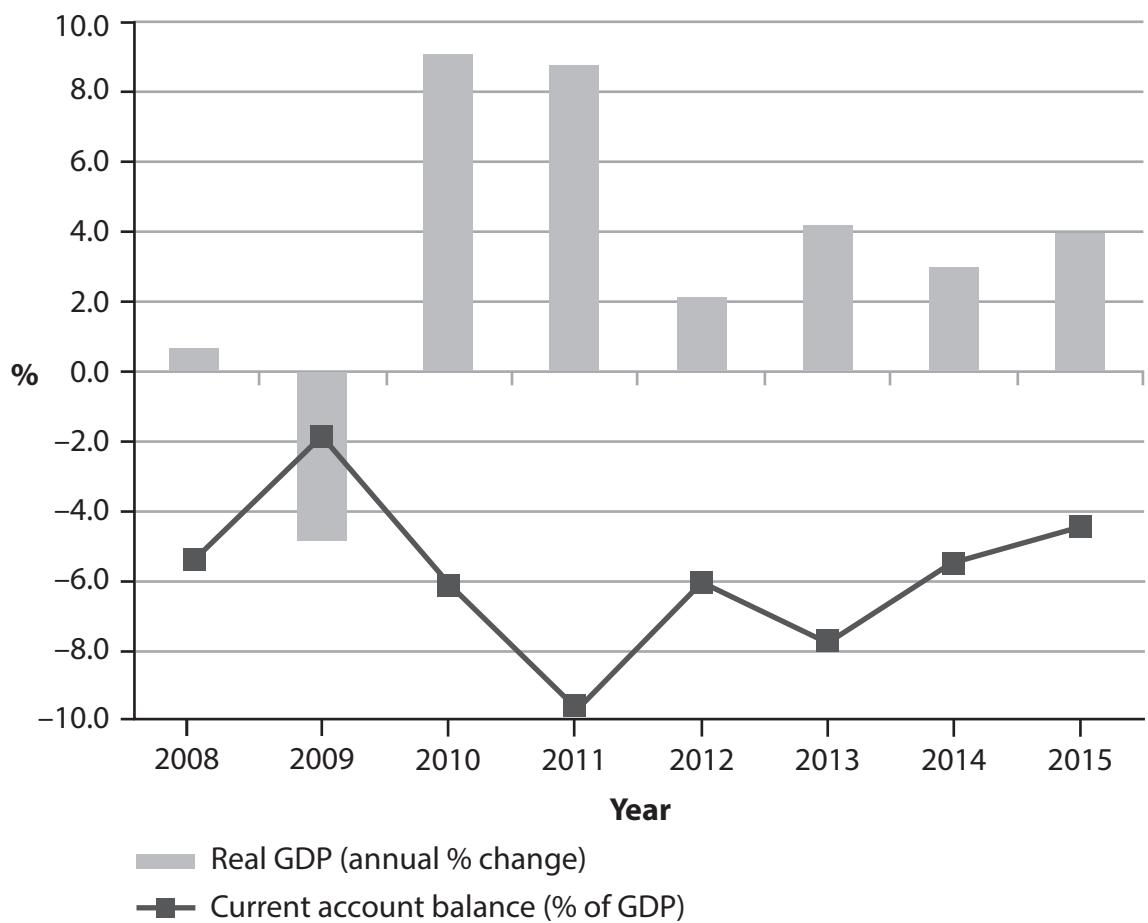

Figure 2 Inflation, household consumption expenditure and investment, 2008–2015

	2008	2009	2010	2011	2012	2013	2014	2015
Inflation, consumer prices (annual %)	10.4	6.3	8.6	6.5	8.9	7.5	8.9	7.7
Household consumption expenditure (% of GDP)	69.8	71.5	71.7	71.2	70.2	70.8	68.9	68.7
Investment (% of GDP)	21.8	14.9	19.5	23.1	20.1	20.6	20.0	18.5

(Source: <http://data.worldbank.org/country/turkey>)

Extract 1 Economic growth

In 2015, the Turkish economy grew by 4%, which was significantly higher than the average rate of the growth of the EU economies.

Turkey may become the seventh fastest growing global economy in 2016, following India, the Philippines, China, Indonesia, Malaysia and Spain.

5

(Source: adapted from <http://www.yenisafak.com/en/economy/turkey-overtakes-eu-in-economic-growth-2530542>)

Extract 2 Economic reforms

Economists say the Turkish Government needs to speed up reforms to increase labour productivity. This may be achieved by deregulation of the labour market.

Turkish economic growth currently relies heavily on consumption. More investment is needed. Therefore, Turkey needs more incentives for firms to invest and households to save.

5

Economists propose that tax incentives should be offered to firms to invest in research and development, for example lower corporate tax on profits.

In 2016, the tax charged on the sale of new homes of more than 150 square metres was reduced from 18% to 8%. The new incentive on house ownership is an important opportunity for those who want to buy a house and provides a boost to the construction industry.

10
